Keyword Index Volumes 120–127 (2000)

0–1 linear programming, (126) 51

Absorption times, (123) 490
Acceptability scores, (120) 162
Acidic deposition, (122) 426
Action-dependent risk, (125) 133
Action elimination, (123) 145
Activity insertion, (127) 297
Activity network, (120) 603
Activity networks, (127) 220
Acyclic directed graphs, (127) 297
Age-dependence, (124) 1
Aggregation, (120) 162
Agreement index, (120) 393
Agriculture, (120) 30, (120) 583, (121) 287, (122) 486, (127) 467
AGV routing, (121) 124
Aids, (124) 1
Air pollution, (122) 219
Air quality management, (121) 218
Air traffic management, (120) 47
Air transport, (123) 125
Airline competition, (121) 641
Airline network design, (127) 44
Algorithm, (120) 228, (122) 115
Algorithms, (121) 1, (125) 283
Alignments, (122) 1
Analysis of algorithms, (125) 249
Analytic hierarchy process, (121) 205, (121) 627, (124) 102, (125) 113
Analytic hierarchy process (AHP), (123) 154, (126) 683
Analytic hierarchy processes, (125) 73
Analytical approximation of linear programs, (126) 69
Analytical formulae, (120) 205
Approximate mean value analysis, (124) 437
Approximate reasoning, (124) 342
ε-approximation, (124) 409
Approximation, (120) 14, (120) 228, (121) 330, (123) 61, (124) 422, (124) 447, (127) 172
Approximation algorithm, (123) 195, (123) 229
Approximation algorithms, (120) 289, (123) 333, (124) 63
Arborescent systems, (127) 483
Arc routing, (122) 11, (124) 360
Artificial intelligence, (120) 459, (123) 558
Assembly system, (123) 504
Assembly system design, (126) 31
Asymmetric decision problems, (121) 579
Asymmetric traveling salesman problem, (121) 124
Attribute tree, (122) 79
Automated guided vehicles, (127) 565
Automatic target recognition, (126) 319
Autonomation, (124) 560
Availability constraints, (121) 1

Backlogging, (124) 550
Ballot theorem, (126) 587
Banking, (121) 559
Banking performance, (120) 525
Base stock systems, (127) 172
Batch availability, (124) 511
Batch ordering, (127) 483
Batch process industries, (126) 131
Batch processing machine, (120) 559, (121) 179
Batching, (120) 228
Beam search, (126) 567
Behaviour, (120) 496
Benders decomposition, (125) 622
Bias reduction, (124) 571
Bilevel linear programming, (126) 454
Bin packing, (125) 222
Binary, (123) 652
Biobjective minimum cost flow problem, (124) 591
Biomedical applications, (124) 139
Boolean quadric polytope, (123) 346
Bounds, (125) 84
Branch and bound, (120) 63, (120) 277, (120) 375, (120) 614, (123) 453, (123) 473, (125) 622, (126) 422, (127) 332
Branch and bound/cutting plane algorithm, (127) 383
Branch-and-bound, (123) 325, (124) 478, (127) 344
Branch-and-bound algorithm, (127) 159
Branch-and-cut, (123) 241, (123) 346, (126) 31
Buffered lines, (120) 260
Burn-in, (126) 534
Burn-in oven, (120) 559
Business process planning, (125) 633

Cactus graphs, (122) 602
Capacitated lot-sizing, (125) 298
Capacitated minimum spanning tree problem, (124) 360
Capacitated network design problem, (122) 534
Capacitated trees, (121) 394
Capacity expansion, (121) 519
Capital accumulation, (121) 193
CAPM, (123) 628
Case-based decision support system, (123) 558
Catastrophe modeling, (122) 452
Cell suppression problem, (123) 29
Cellular manufacturing, (127) 279
Centralized/decentralized decision-making, Stackelberg model, (126) 189
Challenges for OR, (123) 125
Channels of distribution, (126) 189
Choice functions, (120) 144
Choquet integral, (124) 641
Classification, (120) 459, (125) 175
Cliques, (121) 40
Closed queueing network models, (124) 539
CLWS heuristic, (120) 352
CO_2 emissions, (122) 392

0377-2217/00/$ – see front matter © 2000 Elsevier Science B.V. All rights reserved.
PII: S0377-2217(00)00213-7

Coal purchase planning, (126) 218
Column generation, (123) 408, (127) 355
Combinations, (120) 190
Combinatorial analysis, (122) 561, (125) 316, (125) 571
Combinatorial optimization, (120) 408, (122) 509, (123) 394, (123) 531, (125) 266, (127) 525
Communication, (121) 412, (125) 526
Communication blocking, (125) 84
Competence set analysis, (120) 511
Competition, (124) 235
Competitive advantage, (122) 638
Competitive barrier, (122) 638
Completion time optimization, (120) 382
Complex systems, (124) 571
Complexity, (120) 228, (121) 363, (121) 380, (123) 292, (123) 453, (124) 114, (124) 332, (124) 511, (125) 648, (126) 557
Component scheduling, (120) 250
Composition, (121) 64
Compromise programming, (122) 91
Computational algorithm, (126) 587
Computational analysis, (123) 61, (123) 453
Computational complexity, (124) 63
Computer aided design, (126) 541
Computer networks, (122) 509
Computing service, (125) 503
Conflict graphs, (121) 40
Congestion, (123) 105
Consistency, (124) 102, (126) 683
Constrained optimization, (126) 534
Constraint propagation, (127) 332, (127) 355
Constraint satisfaction, (122) 367
Consultancy, (120) 1
Container terminal, (124) 89
Contextual factors, (124) 159
Contextual information, (122) 151
Continued fractions, (125) 239
Continuous 0–1 knapsack problem, (125) 298
Continuous variables, (123) 256
Continuous-time Markov chain, (120) 575
Contract design, (125) 519
$\bar{x}$-control chart, (120) 131
Control, (124) 243, (124) 332, (125) 503
Control limit rule, (125) 133
Convergence, (122) 123
Convex cone, (126) 515
Convex hull, (120) 174
Convex programming, (126) 69
Convex quadratic programming with a convex quadratic constraint, (124) 151
Conveyor stoppage, (124) 560
Conwip, (120) 260
Cooperative game, (127) 519
Cooperative games with side payments, (122) 258
Coordinated replenishments, (123) 490
Co-plot, (120) 525
Core, (127) 519
Correlated demands, (123) 490
Correlation, (121) 64
Cost, (124) 294, (125) 519
Cost allocation, (121) 218, (122) 258
Cost benefit analysis, (125) 316
Cost–benefit analysis, (124) 159
Covering problems, (124) 377
Criterion functions, (122) 219
Critical activities, (127) 220
Critical path, (120) 603
Critical time, (126) 534
Cropping system, (127) 467
Cumulative constraints, (127) 297
Cumulative scheduling problem, (127) 363
Customer service, (120) 118
Cut generation, (123) 408
Cutting, (120) 327, (123) 372, (125) 239
Cutting planes, (121) 609, (126) 408
Cutting-plane heuristic, (123) 195
Cycle cancelling methods, (121) 532
Cycle times, (125) 84

Dangerous goods, (121) 232
Data analysis, (126) 526
Data envelope analysis, (124) 187
Data Envelopment Analysis (DEA), (125) 25
Data envelopment analysis (DEA), (123) 105, (127) 611
Data Envelopment Analysis, (121) 287
Data envelopment analysis, (121) 138, (121) 151, (121) 549, (121) 559, (123) 543, (124) 529, (124) 539, (125) 93, (126) 51, (126) 175, (126) 436, (126) 515, (127) 1
Data smoothing, (124) 15
Database management systems, (123) 614
DEA, (121) 164, (125) 656, (126) 501
Decentralization, (127) 483
Decision analysis, (122) 461
Decision making, (124) 159
Decision making flexibility, (122) 638
Decision support, (122) 367
Decision support system, (122) 501, (125) 633
Decision support systems, (122) 178, (122) 199, (122) 219, (122) 242, (122) 469, (123) 125, (123) 606, (123) 614, (125) 73, (126) 422, (127) 14, (127) 594
Decision theory, (120) 496, (120) 511, (121) 205, (121) 627, (122) 101, (122) 570, (123) 628, (126) 152, (127) 28
Decision tree, (124) 89
Decision-making, (124) 43
Decomposition, (122) 339
Decomposition methods, (121) 105
Demand scenarios, (120) 545
Design, (122) 515, (127) 172
Design of dairy barns, (124) 437
Design of experiments, (124) 55
Deteriorating, (124) 550
Deteriorating jobs, (126) 557
Deteriorating system, (120) 575
Developing countries, (123) 437, (124) 235, (124) 243
Differential costs, (127) 574
Dimension, (125) 571
Directed hypergraphs, (123) 315
Discrete event simulation, (124) 571
Discrete-event simulation, (122) 354
Disjunctive graph, (127) 317
Disjunctive scheduling, (127) 332
Dispatching model, (124) 307
Distribution, (122) 18, (122) 611, (126) 408, (126) 422
Distribution problem, (121) 92
Disturbance, (124) 283
DLSP, (124) 511
DNA sequencing with errors, (125) 257
Dominance, (122) 79, (125) 431
Dominances, (123) 394
Downtime, (124) 294
DRC, (127) 279
DSS, (121) 247
Dual sourcing, (120) 97
Duality, (122) 161
Due date, (126) 557
Due dates, (126) 371
Dynamic location, (123) 1
Dynamic problem, (120) 559
Dynamic programming, (120) 108, (120) 228, (120) 250, (120) 535, (121) 476, (122) 101, (122) 584, (123) 145, (123) 325, (123) 333, (123) 394, (124) 89, (124) 114, (124) 139, (125) 149, (125) 410, (126) 166, (127) 189, (127) 565
Dynamic systems, (121) 435

Economics, (122) 69, (122) 91,(122) 392, (122) 416, (124) 243
Edge-finding, (127) 332
Edge-weighted cliques, (123) 346
Effective frames, (121) 579
Efficiency, (120) 118, (121) 287, (121) 549, (122) 374, (122) 570, (123) 105, (124) 187, (125) 25, (126) 501

Efficiency analysis, (126) 175
Efficiency measurement, (121) 138
Efficient extreme points, (124) 591
Efficient solutions, (124) 651
Efficient solutions, (126) 675
Eigenvalue, (123) 86
Eigenvector, (123) 86
Empirical results, (125) 370
Empirical results, (125) 324
Empirical study, (121) 259
Empirical test, (120) 205
Energy, (122) 416,(123) 606, (125) 1
Engine, (124) 294
Engineering, (121) 343
Environment, (121) 275, (121) 287, (122) 31, (122) 178, (122) 392, (122) 416, (122) 440, (123) 543, (127) 467
Environmental industry, (122) 405
Equipment replacement, (121) 519
Equity, (122) 374
Error analysis, (124) 55
Error specification, (120) 190
Estimates, (122) 123
Eulerian modeling, (122) 426
European options, (120) 205
Evaluation tactics, (124) 159
Evolutionary algorithms, (126) 1
Exact algorithm, (123) 453
Expansion process, (120) 511
Expectation, (126) 288
Expectations, (126) 89
Expected utility theory, (122) 101
Experimental evaluation, (127) 394
Experiments, (122) 339
Expert system, (124) 283
Expert systems, (120) 459
Extended DEA, (125) 25
Extinction, (126) 288
Extreme rays, (122) 534

Facets, (122) 534
Facilities, (123) 292, (123) 473
Facility location, (121) 330, (124) 77
Families, (120) 228
Fault-tolerance, (127) 458
F-convexity, (127) 507
Feasible-direction methods, (121) 78
Feature selection, (123) 16, (126) 526
Finance, (123) 628, (124) 125
Financial planning, (126) 89
Firm models, (121) 164
First passage times, (126) 662
Fix-and-relax, (120) 47
Fixed product lifetime, (127) 537
Flexibility, (122) 41
Flexible assembly systems, (123) 453
Flexible manufacturing systems, (120) 108, (121) 363, (123) 453, (127) 78
Flight scheduling, (126) 491
Flow, (124) 353
Flow propagation, (126) 13
Flow shop, (121) 380, (125) 440, (127) 120
Flow-shop, (125) 469
Flowshop, (121) 179
Flowshop scheduling, (120) 375, (125) 324
Flow-time, (125) 370
Forecast accuracy, (122) 151
Forecasting, (120) 190, (120) 657, (122) 31, (124) 243, (125) 205, (125) 551
Forest management, (121) 247
Fractional programming, (126) 386
Freight transportation, (122) 272, (125) 486
Frequency assignment, (123) 241
Fritz–John conditions, (123) 145
Full recourse, (120) 47
Functional-link networks, (124) 224
Fuzzy assignment, (125) 175
Fuzzy completion time, (120) 393
Fuzzy constraint, (126) 637
Fuzzy control, (124) 342
Fuzzy decision, (124) 307
